### OSHA.gov: Warning & Safety Devices

Powered industrial trucks may be equipped by the manufacturer with the following safety devices:

- ✓ Seat belts and similar restraints
- ✓ Horns
- ✓ Backup alarms that sound when forklift reverses
- ✓ Fire extinguisher
- ✓ Warning lights that flash
- ✓ Directional signals and brake lights
- ✓ Mirrors

### Requirements and Recommended Practices:

Equip every power-propelled truck with an operator-controlled horn, whistle, gong, or other sound-producing device. ANSI B56.1-1969 Incorporated by reference [29 CFR 1910.178(a)(2)]

Where appropriate to the worksite, equip trucks with additional sound-producing or visual (such as lights or blinkers) devices. ANSI/ITSDF B56.1-2005.

[OSHA Instruction CPL 02-01-028 \(CPL 2-1.28A\)](#) - Compliance Assistance for the Powered Industrial Truck Operator Training Standards (Nov. 30, 2000). Section 1910.178 does not currently contain requirements for the use of operator restraint systems. However, Section 5(a)(1) of the OSH Act requires employers to protect employees from serious and recognized hazards.

[OSHA's Seat Belt Policy](#): OSHA's enforcement policy on the use of seat belts on powered industrial trucks in general industry is that employers are obligated to require operators of powered industrial trucks that are equipped with operator restraint devices, including seat belts, to use the devices.

ANSI/ITSDF B56.1-2005 - Safety Standard for Low Lift and High Lift Trucks.
