

Lift Truck Fork Sale

Ask About
*Fork Inspection
Kits*

A fork reduced by 10% in blade thickness has lost 20% of its original strength & should be replaced.

ANSI/ITSDF B-56.1 – 2005 6.2.8 Inspection & Repair of Forks in Service on Fork Lift Trucks

(a) Forks in use shall be inspected at intervals of not more than 12 months (for single shift operations) or whenever any defect or permanent deformation is detected. Severe applications will require more frequent inspection.
(b) Individual Load Rating of Forks. When forks are used in pairs (the normal arrangement), the rated capacity of each fork shall be at least half of the manufacturer's rated capacity of the truck, and at the rated load center distance shown on the lift truck nameplate.
